2 Two

2.1 Logo of University Göttingen (2) 6

List of Tables

Our freedom can be measured by the number of things we can walk away from.

Source unknown (attributed to Vernon Howard)

1 One

1.1 Notes and Acronyms

…You can add todo notes everywhere, Use acronyms, demonstrate abbreviations... 1st Acronym (ONE), 2nd Acronym (TWO), ONEs.

TODO: to be continued

In case you had quite some distance to the last use of an acronym or start a new chapter, you might want to reintroduce it. Use a reset for this and produce another reference to 1st Acronym (ONE).

The notes are only visible in internaldraft mode. This additional mode exists to disambiguate to latex standard draft mode, which will replace pictures by rectangles. Additionally, a time stamp at the bottom helps to sort through revisions.

1.2 Abbreviations

To cope with the special handling of punctuation, you can help LaTeXwith the xpunctuate package, i.e., prevent extra spaces after abbreviation dots which are

Figure 1.1: Logo of University Göttingen (1)

misinterpreted as the end of the sentence etc.. For example in etc. without the extra markup, which might produce extra space when the line is filled.

1.3 Pre-Print Beautification

Only do this if you are sure that nothing changes anymore. Citation needed: cite something?

1. Solve all issues (notes, todos, etc.)
2. Compile without draft notes (otherwise the layout may change).
3. Check the positioning of all floats (e.g., figures and tables).
4. Make sure that there are no overfull hboxes. Indicate appropriate word-break positions or change the sentence.
5. Make sure that there are no single lines or section titles at the end of pages (or single lines at the start...) Use enlargethispage (on both sides of the double page!) to make things fit.
6. Now make sure that the toc looks nice by application of appropriate addtocontents lines.

Please consult the comments in definitions.tex, section Layout-Tuning, for further help to get figures and text aligned nicely before final printing.

2 Two

In which we have no quotation.

For initial structuring and sketching, there are a few environments which are nicely colour coded and only visible in draft mode.

Section Outline:
There is the free-text outline.

Section Outline:

- And of course, for convenience, the itemoutline.
- Use it as fits when structuring your thesis
- And later replace the bullet points with contents.

Use the comment environment to easily comment out larger sections of text.
